

ECHO present to Cardiology Department of Evelina London Children's Hospital

On the 25th January 2017, ECHO was invited to deliver a presentation to the Cardiology Department at the Evelina London Children's Hospital.

This was an exciting opportunity for ECHO to introduce the new brand to Evelina staff, as well as providing information about the many services we now provide to our members.

The presentation also gave us a great opportunity to speak about the history of ECHO and its origins, as well as the many projects we partner on with Evelina London.

Thank you to Dr Aaron Bell for inviting us to speak and to everyone who came to listen!
