

Who we support & why

Connecting support within CHD Journeys

We provide support to:

Children and young people with heart conditions from birth to adulthood

Parents & Carers whose children are diagnosed with a heart condition either prenatally or during childhood, throughout their child's life and at times when they need us most

Siblings of those affected with CHD from birth to adulthood living with a heart child

Wider family who support ECHO members

Professionals supporting families as part of Evelina London Children's Hospital networks.

We aim to support members from across the UK and do so both within Evelina London Children's Hospital, local general hospitals and throughout the community. [Find out how we support families here.](#)

We receive no government or NHS funding and rely solely on public generosity to ensure that we continue to support and empower children, young people and families affected by heart disease.
