Paediatric psychology service

Clinical psychologists support people to understand and manage their experiences, thoughts, feelings and behaviour. The paediatric psychology service helps young people and their families to cope with some of the challenges that can come from having a health condition and/or its treatment.

How are referrals made to the psychology team?

Inpatients: We can meet children, young people and their families whilst they are staying in hospital or prior to being admitted. You can discuss this with your child's doctor whilst they are in hospital if this could be helpful.

Outpatients: We also offer outpatient appointments. If you would like to meet with one of our team, you can ask your child's consultant to make a referral to the paediatric psychology service.
